Commentary

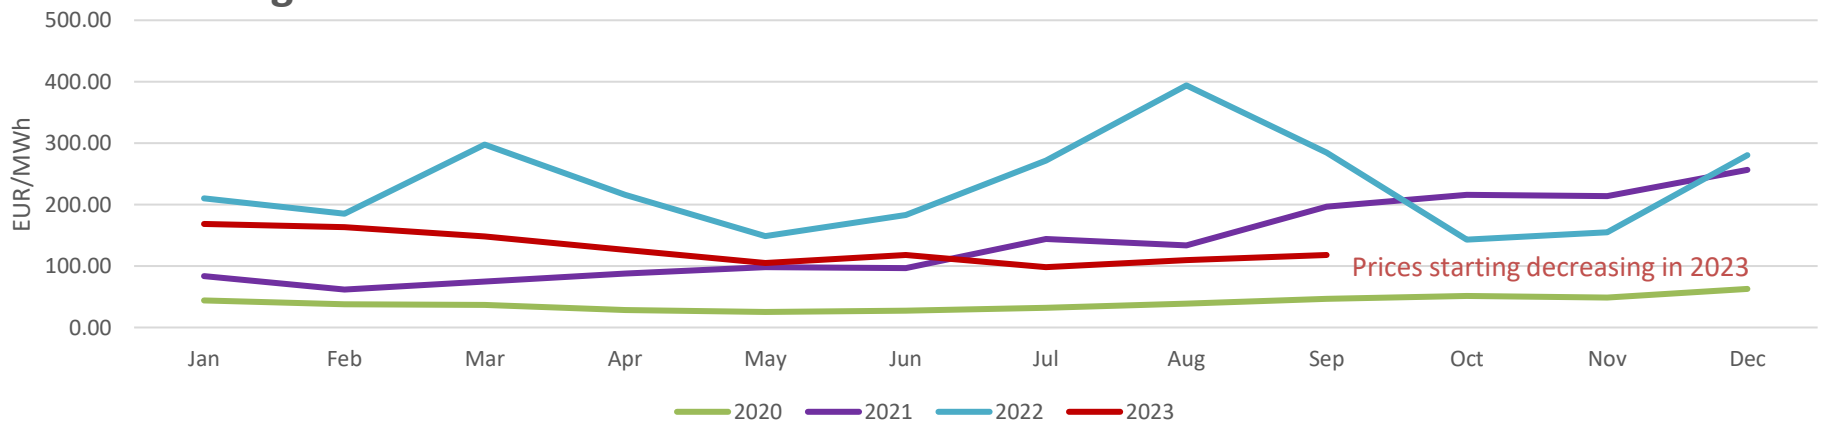

- **Volume** Traded increased by 3% over last year.
- The majority of this increased **volume** traded can be attributed to an increase in energy imports in IDA1.
- The average **volume** traded within the DAM, IDA2 and IDA3 remained similar to last year.
- Due to the decrease in electricity prices, the **total value** traded decreased by 37% compared to last year.
- A total of 1460 auctions were completed with no cancellations.
- There was a 14% increase in membership, the majority were traders.
