

SDAC Decoupling Training Session

3rd November 2021

Agenda

- Overview of Today's Session
- Members' role in today's session
- Conference line: Open from 11:30 – 11:45 GMT and 15:30 – 15:45 GMT

Overview of Today's Session

BACKGROUND:

- In the last 2 years, three major incidents have occurred that led to a partial decoupling of the SDAC Market which resulted in recommendations made to perform training sessions involving all operational parties (TSOs, NEMOs, CCPs, Shadow Auction entities, etc.) including Market Participants.

OBJECTIVE:

- This training session is organised to give all parties involved the opportunity to validate that they are properly prepared to handle such a day-ahead market decoupling incident in real operations and real-life conditions.

SCENARIO:

- A full decoupling due to issues with the central calculation process will be simulated. This means that no SDAC market coupling results will be available, but local auctions/regional coupling will be triggered.
- Note the session will begin at 8:00 GMT (Order Book Open), with NEMOs and TSOs completing a simulation of a standard auction process

REFERENCES:

- For further reference, please refer to the [SEMOpX Operating Procedures](#) (Sections E1.5 & 1.7 – Fallback Procedures)

Members' Role in Today's Session

Simulation Schedule (Trade Date – 04/11/2021):
