ETS Client Production Version Information

Important information – Action required

- ETS client versions in production
 - ETS 3.5.3 available for PROD
 - ETS 3.5.5 available for PROD
 - Unavailability of the Simulation 2 environment until end of July 2022

Dear Member,

With this communication, SEMOPx would like to inform you that following our last ETS maintenance on 21 June 2022 evening, we have two ETS versions in production, the 3.5.3 and the 3.5.5 versions.

Since 3.5.3 and 3.5.5 are working under the same server, you did not notice any changes compared to the ones we have communicated as Updates on the 3.5.3 client (API security updates).

Both ETS client versions 3.5.3 and 3.5.5 are supported and they are equal. The API users have faced no issue irrespectively to the versions.

SEMOPx would like to reassure members that those two versions have the same features. The 3.5.5 version was needed for the upgradable client to prepare for the upcoming upgrade from 3.5 to the 3.6 version.
