

SEMOPx Info – 05 May 2022

M7 6.12 Release – Go-Live Date 10 May 2022

Important information – Action required

- M7 6.12 release to go-live on **10 May 2022**
- Release includes implementation of Load Management (Technical Phase)
- Reminder: Member testing available since 22 March 2022 until go-live
- **[New Com Trader 6.12 version](#) mandatory** as of go-live
- **Final decommissioning of the old M7 prod URLs**
- **API:** list of known M7 6.12 API issues and fixes ([link here](#))

Dear Member,

SEMOPx are pleased to inform you about the go-live date of the M7 6.12 release, which is scheduled for **Tuesday 10th May 2022**, subject to successful testing.

Load Management (Technical Phase)

As described in the presentation on 10th March 2022 ([link here](#)), this new release will introduce the M7 Load Management (no warning nor load restrictions during this first “technical” phase). We strongly recommend our API customers to perform regression tests with their API implementation and modify it if required.

Decommissioning of Old M7 Prod URLs

During the maintenance window, old M7 URLs will also be decommissioned. The exact maintenance window timing will be announced via an Operational Market Message (OMM) soon.

The new production ComTrader 6.12 version will be **mandatory** and can be downloaded here: <https://portal.m7.energy/semo/extra/>.

Please run the ComTrader 6.12 client only for Web Start testing purposes, but do not use it in production before M7 6.12 go-live.

Additional Resources

- Updated M7 Manuals – can be found [here](#)
- M7 Load Management User Guide – can be found [here](#).
