

Release note

System(s) concerned

M7

Target go-live

23/10/2018

Content description

This version 6.5 includes changes that are mainly not related to SEMOpx but rather XBID and EPEX markets.

Deployment plan

Pre-deployment steps

- Communication to SEMOpx members of the maintenance and content

Deployment steps

- The release will be deployed on 23/10 from 18:40 and 21:15 BST/IST. The market will not be available during this period of time.

Post-deployment steps

- After confirmation of the successful deployment by the provider, MO informs about the opening of the market and then reopen the market.

Documentation

- Updated userguides and documentation of M7.

Impacts on SEMOpx participants

The only point relevant for SEMOpx and its participants is the addition of a namespace in the TC xml report that can be retrieved from the backoffice

Before:

```
<?xml version="1.0" encoding="UTF-8" standalone="yes"?>
<tc540>
  <rptHdr>
```

After

```
<?xml version="1.0" encoding="UTF-8" standalone="yes"?>
<tc540 xmlns="http://deutsche-boerse.de/m7-re/6.3.8">
  <rptHdr>
```

It will impact the reports generated after the deployment date

Concerning the trade recall

We have been informed that an issue has been found on the changes implemented for the trade recall reactivation.

In order not to delay the implementation of the release, it is likely that we will deliver as planned in production but trade recall will not be reactivated.

The phone call process for you will be maintained longer than expected.
